

## Tailor-made Harman Kardon<sup>®</sup> Sound for the Volvo V70, XC70 and XC60

Harman Kardon brings decades of experience and excellence in sound to the new partnership with Volvo. Delivering a brilliant, perfect surround sound, carefully tailored for each model that sets new standards in listening pleasure.

The Volvo models V70, XC70 and the new XC60 are Volvo's diverse offerings in the SUV and station wagon segments. While V70 and XC70 represent the traditional station wagon approach, the XC60 displays a new way of thinking in the SUV world, the Volvo way. Whether hauling family and luggage or driving up the bumpy side of a mountain, Volvo owners are doing it in comfort and style. And they want their sound systems to be a seamlessly integrated part of this world, which is where Harman Kardon comes in. The engineers took the increased interior space of the V70/XC70 and XC60 ranges into account and devised a system with up to 14 speakers perfectly located around the interior of the SUV for a comfortable yet powerful sound experience.

The 650W Class-D amplifier creates a powerful rich sound with crystal clear highs and powerful, low-distortion bass that remains reliably rich and consistently smooth even at the deepest of frequencies.

- ✓ 5 or even 7 Class-D channels with 130W each ensure superior power reserves for a wide dynamic range
- ✓ Two optional 130 mm bandpass subwoofers in the luggage compartment make use of additional body volume in an unobtrusive yet highly effective manner
- ✓ The Harman Kardon sound system integrates neatly into the stylish interior of the V70, XC70 and XC60
- ✓ Harman Kardon uses Dirac Live™ phase linear FIR filters for a superior sound reproduction over the entire frequency range
